14" x 35.25"

General File Set-up Instructions:

- Provide artwork according to Printing Specs.
- Print-ready files must be in PDF format at full scale, full bleed, and saved with the option "High Quality Print."
- File resolution must be 150 - 300dpi, not exceeding 45MB.
- Name files as - <Businessname>_<projectID>_<YYYYMMDD>.
- All colors must be converted to RGB, black as "Rich Blacks" R=0 G=0 B=0.
- Do not add registration or crop marks.
- **PLEASE OUTLINE FONTS** before sending print file.

Template Tips:

- 1) Our templates consist of three layers:
 - Template layer - shows all template lines and should be deleted or hidden before sending.
 - Handago Verbiage - Printed to describe finished product.
 - Print layer - Contains your art work and extends to or past the solid blue line.
- 1) Our templates consist of three lines:
 - one solid blue line (bleed),
 - one dashed red line (visible area) and
 - one solid black line (actual document).
- 2) Artwork must extend to edges of solid blue line (bleed).
- 3) Any important artwork should be inside red dashed line.
- 4) Remove template layer before sending print file.

Important-The black top and bottom banners will be printed on all ad panels. This will tell your customers what this dispenser supplies.

**Send final artwork to both emails below:
rhenderson@speedpro.com
kimparker@handagoinfo.com**
